

is pleased to launch Maharat digital platforms
to support children with variety of
educational and behavioral challenges

Maharat Online Tele Health

**If you are concerned with your child development?
need coaching?, or cannot access evidence based
therapy?, or need professional advice?**

This is our new collaboration between all our medical and educational centres Child Early Intervention Medical Center, Maharat Learning Center and Maharat Arabia Learning Center to offer any new client consultation with specialists in Psychology, Behavioural, Speech and Language and Occupational Therapy. We also offer Online ABA Intake Meeting, Programs Supervision and Online Programs while families are at home.

iEducation

**Are you struggling for resources to support
your child or student with additional needs?**

A new complete online resource platform to support families, teachers and children affected with a variety of learning challenges.

The platform has books, videos, applications, scientific papers and educational resources available in Arabic and English.

Zoom Online ABA therapy and distant Learning Support

All our ABA therapists providing online services are trained to support the child ABA program with a parent or caregiver present. The following is also offered to parents to support their skills development

- Online parent training
- Parent training videos
- "Keeping Busy at Home" kits for parents which would include workbooks, illustrations, examples, ideas, and materials.

Additionally, we offer the following for further therapeutic skill development:

- RBT
- BCBA CE Webinars in the coming few weeks

**If your child has Autism or any developmental
disorder and want to learn to work with your
child, we are there to help.**

A digital ABA online platform as a complete digital solution for programs, data collection, graphs and monitoring progress.

This is for therapists to access children programs from anywhere, enter data and monitor progress online.

Each child has his/her program set up online and his/her therapist access the online platform through their user name and password from any mobile device.
